

Boil Water Notice for Wellborn Special Utility District
July 14, 2022

Due to reduced distribution system pressure caused by extreme water demand created by excessive outdoor watering, the Texas Commission on Environmental Quality has required Wellborn SUD Brazos County PWS # 0210016 to notify all customers to boil their water prior to consumption (e.g., washing hands/face, brushing teeth, drinking, etc). Children, seniors, and persons with weakened immune systems are particularly vulnerable to harmful bacteria, and all customers should follow these directions.

To ensure destruction of all harmful bacteria and other microbes, water for drinking, cooking, and ice making should be boiled and cooled prior to use for drinking water or human consumption purposes. The water should be brought to a vigorous rolling boil and then boiled for two minutes.

In lieu of boiling, individuals may purchase bottled water or obtain water from some other suitable source for drinking water or human consumption purposes.

When it is no longer necessary to boil the water, Wellborn SUD officials will notify customers that the water is safe for drinking water or human consumption purposes.

Once the boil water notice is no longer in effect, Wellborn SUD officials will issue a notice to customers that rescinds the boil water notice in a manner similar to this notice.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

If you have questions concerning this matter, you may contact Stephen Cast 979-690-9799 or email: scast@wellbornsud.com.

This boil water notice is necessary due to the loss of system pressure as required by TCEQ. The District's current loss of pressure is due to the extreme high demand put on the system as a result of customer non-compliance to the district previously issued outdoor watering schedules.
